- Innovative Reproductive Solutions (E-tegrity)
- Recombine-Genetic testing

In order to obtain the most technologically advanced testing we are referring you to an outside specialty laboratory that may or may not be contracted with your insurance. If your benefit plan includes non-network benefits, the non-network costs will apply. If your plan does not include non-network benefits, you will be responsible for the entire cost of the laboratory service.

As independent full service embryology/andrology laboratories, Ovation Fertility and San Antonio IVF’s experienced lab personnel have the technology and expertise to provide high quality accurate results, which is a vital part of any infertility practice. For this reason, we refer all patients to Ovation Fertility and San Antonio IVF for andrology and embryology services. Ovation Fertility and San Antonio IVF are not contracted with all insurance companies. Some of the physicians at Texas Fertility Center have an ownership interest in both Ovation Fertility and San Antonio IVF.

I acknowledge and agree to being referred to a non-network laboratory should it be recommended during the course of my treatment or care.
